

Course: Cloud DevOps Engineer

Project: Give Your Application Auto-Deploy Superpowers

Student: Duong Quoc Hung

Development Operations

Why you learn how to build CI/CD pipeline and logging and monitor?

- Explain the fundamentals and benefits of CI/CD to achieve, build, and deploy automation for cloud-based software products.
- Utilize Deployment Strategies to design and build CI/CD pipelines that support Continuous Delivery processes.
- Utilize a configuration management tool to accomplish deployment to cloud-based servers.
- Surface critical server errors for diagnosis using centralized structured logging
